

Non-ferrous metalworking finds from the fieldwork at Kaupang 1998–2003

© Terje Gansum

Unn Pedersen
Department of Archaeology, Conservation and History
University of Oslo

Introduction

The investigation includes the following numbers in the collection of The Museum of Cultural History, University of Oslo:

- C52003, C52263, C52264 and C52517: Surface surveys, including metal-detecting 1998–2002
- C52265: Test pits 1999
- C52516: Cultural resource management excavations, CRM, 1999–2003
- C52519: Main research excavation, MRE, 2000–2002
- C53160: Excavation in the harbour area 2003

The interpretation of the contexts is based on the Kaupang-database in the Intrasis documentation system and Pilø et al. 2000, 2003, with following additions:

- Plot 4B layers included in SP II: AL45476, AL46579, AL46595, AL46995, AL47590, AL42042 and AL42561 (Wiker 2001; Gaut 2011)
- House A304: AL82178, AL83707, AL83768, AL85299 and AL89480
- Cleaning layer AL19423 is included in the modern plough-layer
- A100 spit 1: Mixed plough-layers
- A100 spit 2 R3870–R3975: SP I–III/The later medieval plough-layer
- A100 spit 2 from R3870 and southwards: SP I–III (except G8355–8356 disturbed by drainage ditches and interpreted as the modern plough-layer)
- A100 spit 3–5: SP I–III

Abbreviations referring to the coding in Intrasis: F = Find unit, O = Area, A = Archaeological object, L = Layer, G = Excavation unit, R = square

Weights are in grams and measurements in cm.

The finds are presented in Unn Pedersen 2015: *Into the Melting Pot: Non-ferrous Metalworkers in Viking-period Kaupang*. Kaupang Excavation Project Publication Series, Volume 4. Aarhus University press. Aarhus.
