

Table 2: Example from the data analysis process

Natural meaning units	Subcategories	Main theme
<p><i>“Well, I`m a farmer and I am in more risk of such things (infections) so this issue was highlighted for me...Yes, that I have to be a bit more aware of those things since I am occupied with horses, I am cleaning the stable, and I have a low immune system, you know, so I have to be extra careful about such thing, so all these aspect were taken good care of for me... being and individual subject»</i></p>	<p>Experiencing the issues presented as relevant.</p>	<p>An extended version of tailoring.</p>
<p><i>“The nurses were really good at asking the patients what we are occupied with, about our life situation. Each of the nurses started the education session with asking how I was and so on ...So I felt that each and one of them talked to me as the person I am, and being focused on where I am”</i></p>	<p>Experiencing methods used for tailoring the education.</p>
